# HARI METKARI

harimetkari25@gmail.com, +91-9881462183

## Key Skills

MuleSoft Application Development and Support

Requirement gathering

Client engagements (Stakeholders/ Business team)

API & UI Automation Mule Integration

RAML, API Policies & SSL/TLS Implementation

DevOps: Deploying Mule app using CI/CD pipeline **Jenkins**, **TeamCity**, **Octopus** on CloudHub

Debugging & Troubleshooting Mule Applications

Building API(REST & SOAP), UFT tool

MySQL Database Design

*Self-motivated and hard-working professional with proven technical and leadership abilities. Seeking to contribute my expertise as a Mulesoft Developer/Lead within your organization. A dedicated team player with strong problem-solving skills, I can be relied upon to deliver high-quality results and support the company in achieving its goals.*

## Profile Summary

- Having 14 years of IT experience and 7+ years of experience with **MuleSoft Integration platform.**
- Software implementation life cycle (i.e., analyze, design, build, test, implement, support) ,MuleSoft/Integration Application Development.
- Expertise in MuleSoft-ESB,API Development, Enterprise Application Integration, Software Development and Support.
- Skilled in analyzing **information system needs, evaluating end-user requirements**, designing solutions and troubleshooting information systems.
- **Expertise in Shipping, Telecom, Banking and E- commerce domain;** technical expertise in **Anypoint platform**, **API implementation**, **Building API** (REST and SOAP) Implementation interfaces, **Designing RAML**, **Routing Events** using Choice and Scatter-Gather router, **Batch processing**, **Transforming Data with DataWeave**, using various **Connectors** and **Processing Records.**
- Debugging and Troubleshooting Mule Applications & **API automation**
- Deploying Mule app using **CI/CD** pipeline **Jenkins, TeamCity, Octopus** on **Cloudhub**.
- Traveled onsite **Tieto Estonia & Finland** country for Knowledge Transition.

## Work Experience

**Since December 2024 with Nexturn Inda Pvt. Ltd, as Principal Cloud Engineer – Integrations**

Project: **FTFCU (First Tech Federal Credit Union)**
Domain: Banking
Customer **FTFCU (US)**
Language: Mule ESB
Backend: MySQL, PostgreSQL, Oracle

**Key Result Areas:**

- Expertise in MuleSoft-ESB,API Development, Enterprise Application Integration, Software Development and Support.
- Anypoint platform, API implementation, Building API (REST and SOAP) Implementation Interfaces, **Jenkins**, **TeamCity**, **Octopus**
- Interacting with the client & system engineering team for requirements gathering.
- Code review, debugging & troubleshooting the application; extending post go-live & application maintenance support
- Liaising with stakeholders during the course of problem diagnoses, requirements gathering, detailed level design, development, system test and production implementation to ensure that optimal resolutions were achieved

**Significant Accomplishments:**

- Played a key role within the European regional team and for Cargotec, TeliaSonera & Elisa customer, supported project delivery within the region.
- Anypoint platform, API implementation, Building API (REST and SOAP) Implementation Interfaces, **Jenkins, TeamCity**, **Octopus**
- Designing RAML, Routing Events using Choice and Scatter-Gather router
- Transforming Data with DataWeave scripts to convert JSON, XML, and Java data structures to different data structures using various Connectors and Processing Records
- Apply various Security policies such as **Oauth2.0, Client ID Enforcement and Basic authentication**
- Implemented Two-way communication **SSL/TLS configuration**
- Debugging and Troubleshooting Mule Applications
- Deploying, Managing APIs and Integrations using **CI/CD pipeline** , **Jenkins ,TeamCity**, **Octopus on Cloudhub**.
- Hands-on experience on using repository tools like Maven, Jenkins, Bitbucket, SVN for Mule ESB Applications.
- Designed and implemented a web application using technologies such as CGI,PERL,PHP, Python, JavaScript and Shell scripts that streamlined critical problems in Cargotec & TeliaSonera appls cut set-up time and significantly reduced human error
- Analyzed and modified existing codes to incorporate changes in the Cargotec and Telia application.

## Previous Experience

- **March 2022 to Nov 2024 with CGI, Pune as Lead Analyst**
- **Sep 2010 to Feb 2022 with TietoEvry India Pvt. Ltd., Pune as Senior Software Engineer**
- **Jan 2009 to Sep 2010 with Verve Communications Pvt. Ltd., Pune as Software Engineer**
- **Nov 2005 to Jan 2009 with Graphinet Solutions Pvt. Ltd., Pune as Web Developer**

## Education

- MCA from Shahu Institute Business of Education & Research Centre (SIBER), Kolhapur, Shivaji University

## Certifications

- MuleSoft Certified Developer Level 1 (Mule 4)
- Salesforce Certified MuleSoft Platform Integration Architect
- AWS Certified Solutions Architect – Associate
- Certified SAFe 5 Scrum Master
- ITIL-V3 EXIN (Foundation Examination

## IT Skills

| | |
|---|---|
| Technologies Used | **Mule ESB**, **Anypoint platform**, **TeamCity**, **Octopus**, Building API (REST and SOAP) Implementation Routing Events using Choice and Scatter-Gather router. **API Automation** using **UFT** tool. |
| Databases | MySQL, PL/SQL, PostgreSQL and Oracle. |
| Languages | CGI, PERL, PHP, Python, Shell Scripting and JavaScript. |
| API and web-service | API, REST, SOAP design, coding and implementation. |
| Development tools | Maven, **Jenkins**, Bitbucket, **TeamCity**, **Octopus**, Confluence, Jira and Wiki. CI/CD pipeline on Cloudhub |
| Monitoring Tools | **Grafana**, Nagios/Cacti Monitoring, |
| Operating Systems | UNIX, LINUX (RHEL 6.0, CentOS, Fedora), Solaris and Windows. |

## Personal Details

**Languages Known:** English, Hindi, Marathi
**Full Name:** Hari Rama Metkari
**Address:** A-508, Umang Premiere, Ivy Estate, Nr. Lexicon International School, Wagholi Pune-412207

## Annexure:

**Organisation**: **CGI**
Project: **ADT**
Domain: Security Systems
Customer **ADT**(US)
Language: Mule ESB, **API Automation** using **UFT** tool.
Backend: MySQL, PostgreSQL, Oracle
Duration: 33 Months
Description: **ADT** is an American company that provides residential, small and large business electronic security, fire protection, and other related alarm monitoring services throughout the United States.

**List of Features:**

- Anypoint platform, API implementation, Building API (REST and SOAP) Implementation Interfaces
- Worked on **API Automation** using **UFT tool**.
- Transforming Data with Data Weave scripts to convert JSON, XML, and Java data structures to different data structures and data types using various Connectors and Processing Records
- Designing the **RAML** and publishing to AnyPoint exchange
- Apply various Security policies such as **Oauth2.0, Client ID Enforcement, Basic authentication, and rate limiting**
- Implemented Two-way communication **SSL/TLS configuration**
- Debugging and Troubleshooting Mule Applications
- Managing APIs, Deploying Mule app using **CI/CD** pipeline on **Cloudhub**

**Organisation**: **TietoEvry India Pvt. Ltd.**
Project: **Cargotec**
Domain: Shipping
Customer **Cargotec** (Finland)
Language: Mule ESB
Backend: MySQL, PostgreSQL, Oracle
Duration: 3 Years
Description: Together with our business areas Kalmar, Hiab and MacGregor
we offer products and services that make global trade faster, smarter and more sustainable.
Cargotec Oyj is a Finnish company that makes cargo-handling machinery for ships, ports, terminals and local distribution.

**List of Features:**

- Anypoint platform, API implementation, Building API (REST and SOAP) Implementation Interfaces
- Routing Events using Choice and Scatter-Gather router
- Implemented **Grafana** tool for Mule application logs store in Postgres SQL DB using **Log4j**
- Transforming Data with Data Weave scripts to convert JSON, XML, and Java data structures to different data structures and data types using various Connectors and Processing Records
- Designing the **RAML** and publishing to AnyPoint exchange
- Apply various Security policies such as **Oauth2.0, Client ID Enforcement, Basic authentication, and rate limiting**
- Implemented Two-way communication **SSL/TLS configuration**
- Debugging and Troubleshooting Mule Applications
- Managing APIs, Deploying Mule app using **CI/CD** pipeline on **Cloudhub**

**Organization**: **TietoEvry India Pvt. Ltd.**
Project: **TeliaSonera**
Domain: Telecom
Customer TeliaSonera (Sweden country telecom operator)
Language: CGI, Perl, PHP, Shell Script, JavaScript
Backend: MySQL, Oracle
O.S.: Linux, Solaris
Duration: 5 Years
Description: "**NPAS**" means "Number Portability Administration System" for TeliaSonera customer. Coordinated with all TeliaSonera porting activities with other service providers. An adapter between the Swedish standard porting process (external

interface implemented by SNPAC) & TeliaSonera internal porting process. The process for Number Portability between service providers for mobile and fixed numbers.

**Event Application**: A ticket management system for Skanova in PHP and MySQL technology. It enables its users to monitor and follow-up on the workflow in the organization, minimizing duplication of effort in the process.
Information such as notes, work logs and files are collected and maintained in one location, accessible by all authorized co-workers. LADP implemented for TeliaSonera Active Directory (TCAD) in Event application.
**List of Features:**

- Currently supports five different types of tickets.
- Each type supports several subtypes, each with their own set of attributes.
- Powerful search engine and File attachments
- Fine grained access control and Excel spreadsheet export
- Saved searches, with favorites

Project: **Elisa ASM**
Domain: Telecom
Customer Elisa (Finland country telecom operator)
Language: CGI, Perl, PHP, Shell Script and JavaScript
Backend: MYSQL
OS: Solaris, Linux
Duration: 3 Years
Description: Worked on various network-based applications for Elisa European customer. It consists of following features.

- Apache virtual hosts configuration
- IP address-based access list in Apache virtual host configuration
- Adding a rewrite rule to Apache for a web site
- SSL implementation
- LDAP Implementation
- Batch Runs - DNS Implementation
- ProFTP - Apache Web Server
- Sendmail :
  The managing mail relaying servers for Nordea's customer. They relay mail from Internet to Nordea's systems and vice versa and are the MX servers for all significant Nordea domains. Solving mail delivery problems and load average, Mail queue, Mail Traffic, analyzing of SMTP logs, SMTP debugging using telnet utility. Monitoring apache statistics and CPU usage using Cacti Monitoring tool.

Project: **Drupal Bundle**
Language: PHP, Shell Script, Drupal, CGI, PERL, JavaScript
Backend: MYSQL
O.S : Linux
Duration: 2 Years
Description:
Drupal Bundle is built on LAMP stack and provide various component like PHP, Drupal, MySQL, Apache web server with single installation. Led implementation varnish cache with Drupal Bundle.
It consists of following features.

- Content Management System (Drupal) & Web Server
- Mysql Database server and Security & Performance
