Name	Toshi Darode
Current Job Role	Salesforce Data Cloud Architect
Experience	10+ YOE
CRM Administration	Salesforce Certified Administrator
Certifications	Salesforce Certified Sharing and Visibility, Salesforce Certified Data Architect, Salesforce CPQ Specialist, Salesforce Certified Administrator, Salesforce Certified Service Cloud Consultant, Salesforce Certified Sales Cloud Consultant, Salesforce Certified Platform Developer I
Salesforce Expertise	Data Cloud, Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud, Salesforce Industries, Omni-Studio, CPQ
Languages	Apex, SOQL, LWC
Salesforce Components	Data Cloud, Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud, Omni-Studio, CPQ, Partner Community, Salesforce Industries
Ticketing & Case Management	NA
Database	NA
Salesforce Clouds	Data Cloud, Experience Cloud, Sales Cloud, Service Cloud, Marketing Cloud
Soft Skills	Technical leadership, architectural oversight, communication, mentorship

PROJECTS DETAILS:

Project 1: (Service Cloud, Experience Cloud, Data Cloud, Omni-Studio, Marketing Cloud, Salesforce Industries for Travel,	**Role:** Architect **Industry:** Travel & Hospitality Transformation **Duration:** 18 Months **Project Description & Key Responsibilities:** 1. The client is a large travel and hospitality organization operating across multiple destinations and transport services. 2. Salesforce Industries for Travel, Transportation & Hospitality (TTH) was

Transportation & Hospitality, Travel & Hospitality Transformation)	implemented using Service Cloud, Experience Cloud, Data Cloud, Omni-Studio, and Marketing Cloud to unify traveler engagement, partner operations, and service management on a single platform. 3. Designed and architected Salesforce Industry Cloud solutions for Travel, Transportation & Hospitality, leveraging Omni Studio (Flex Cards, Integration Procedures, Data Raptors) to accelerate industry-aligned implementations. 4. Led end-to-end architecture across Service Cloud and Experience Cloud to manage traveler service requests, disruptions, grievances, and partner interactions through scalable, secure portals. 5. Implemented Salesforce Data Cloud as a unified traveler data hub, enabling identity resolution, profile unification, calculated insights, and real-time audience activation into Marketing Cloud journeys. 6. Partnered with business stakeholders to translate complex tourism and transportation requirements into solution blueprints, estimations, and reference architectures aligned with Salesforce industry best practices. 7. Provided architectural governance and technical leadership to delivery teams, ensuring performance, scalability, and long-term platform adoption across multi-region deployments.
Project 2: (Data Cloud, Sales Cloud, Service Cloud, Marketing Cloud, Service)	**Role:** Technical Architect **Industry:** Service **Duration:** 26 Months **Project Description & Key Responsibilities:** 1. CIMET operates service comparison websites across six different verticals in Australia. 2. The project focused on implementing Salesforce Data Cloud as a unified data platform and integrating with Salesforce Marketing Cloud for personalized engagement. 3. Collaborated with Delivery Managers, Architects, and clients to design Salesforce and Data Cloud solutions enabling data-driven business outcomes. 4. Created scalable architecture and Data Cloud integration diagrams covering ingestion using Zero Copy Retention, identity resolution, and activation. 5. Owned end-to-end delivery of Data Cloud–centric Salesforce implementations from design through activation. 6. Ensured compliance with Salesforce and Data Cloud best practices, governance standards, and platform limits. 7. Delivered integrated Data Cloud and Marketing Cloud solutions for real-time segmentation and personalized journeys. 8. Mentored teams on Salesforce Data Cloud best practices and led cross-cloud solution delivery.
Project 3: (Community Cloud, Service Cloud, Hotel Industry)	**Role:** Salesforce Technical Lead **Industry:** Hotel Industry **Duration:** 22 Months **Project Description & Key Responsibilities:** 1. Deliveroo (UK) requires a streamlined solution for delivery partner onboarding and management. 2. Partner Community was implemented to simplify registration, enhance engagement, and support operational efficiency through integrations and automation.

	3. Architected and customized Salesforce Partner Community for scalable partner onboarding, registration, and engagement. 4. Implemented secure third-party integrations leveraging REST/SOAP APIs, OAuth, and Middleware to enhance partner experience. 5. Integrated DocuSign using Salesforce APIs and event-driven workflows to automate contract execution and compliance. 6. Delivered Payment Gateway integrations supporting secure transactions, tokenization, and automated partner payouts. 7. Designed and implemented robust Salesforce integrations with external systems using APIs, middleware, and asynchronous processing. 8. Diagnosed and resolved complex integration failures to ensure high availability and operational continuity. 9. Enforced Salesforce best practices, security models, data governance, and platform limits across all implementations.
Project 4: (Sales Cloud, Partner Community, Manufacturing Industry)	**Role:** Salesforce Senior Solution / Technical Lead **Industry:** Manufacturing Industry **Duration:** 24 Months **Project Description & Key Responsibilities:** 1. Tectronix engaged Salesforce to modernize and streamline their global sales operations. 2. The focus was on implementing Sales Cloud, optimizing sales processes, enabling complex pricing models, and ensuring seamless integrations with external systems. 3. Led end-to-end Sales Cloud implementations, translating business requirements into scalable technical solutions. 4. Designed and configured Opportunity Management processes, including custom sales stages, validation rules, and automated workflows to streamline sales operations. 5. Managed Product and Price Book configurations, supporting multi-currency setups and complex pricing models for global sales teams. 6. Developed Apex batch classes and scheduled jobs for large volume data processing and periodic system tasks. 7. Implemented Future methods and asynchronous processing to optimize performance and comply with Salesforce governor limits. 8. Oversaw technical solutioning and code reviews, guiding a development team to deliver high-quality customizations. 9. Integrated Sales Cloud with external systems using REST APIs for seamless data synchronization. 10. Ensured adherence to Salesforce best practices, security, scalability, and maintainability in all customizations. 11. Collaborated with stakeholders to define deployment strategies and release management processes. 12. Worked on the Aura framework to implement end-to-end guest login functionality for Partner Community. 13. Provided technical leadership and mentorship to developers, fostering skill development and knowledge sharing.
Project 5: (Experience Cloud, Service Cloud, BFSI)	**Role:** Senior Salesforce Consultant **Industry:** BFSI **Duration:** 14 Months **Project Description & Key Responsibilities:** 1. American Express initiated a migration project to move from the legacy

	Partner Portal to Salesforce Experience Cloud. 2. The goal was to enhance partner engagement, improve security, streamline payment processes, and align the platform with the corporate brand identity. 3. Led the migration from Partner Portal to Experience Cloud, ensuring a seamless transition for premium partners. 4. Customized Experience Cloud with page variations and audience targeting to deliver personalized user experiences. 5. Managed user access, security settings, and sharing rules to ensure appropriate data visibility and compliance. 6. Implemented Payment Gateway integration for secure partner transactions. 7. Integrated DocuSign into the community using open APIs to automate agreements and compliance processes. 8. Configured navigation menus, themes, and branding to align Experience Cloud sites with corporate identity. 9. Applied security and data protection mechanisms in SFDC orgs using Profiles, Permission Sets, OWD, Roles, and Sharing Rules. 10. Extensively used DevOps processes (Branching strategy, SourceTree, Jenkins) for deployments across environments. 11. Worked within Agile methodologies (stand-ups, sprint planning, implementation, and support) to deliver incremental value.
Project 6: (Sales Cloud, Telecom)	**Role:** Salesforce Developer **Industry:** Telecom **Duration:** 25 Months **Project Description & Key Responsibilities:** 1. While working with Zensar Technologies, I contributed to the Salesforce implementation for GE Electronix. 2. The focus was on building custom solutions, exploring Salesforce capabilities, and enabling integrations to support business operations. 3. Developed Apex triggers, classes, Visualforce pages, and test classes to support business requirements. 4. Explored and implemented Salesforce customization to extend standard platform capabilities. 5. Learned and applied test-driven development by building unit test classes for custom code. 6. Worked on REST API integrations to connect Salesforce with external systems. 7. Utilized out-of-the-box functionalities such as Web-to-Lead, Lead Conversion, and Campaign Management.
